COMPANY PROFILE

Tianjin Longdong Auto Parts Co., Ltd. is one of China's leading manufacturers of 4WD vehicle parts. We own our own factory, office building, and large warehouse.

Our goal is to provide you with high-quality, reasonably priced, and stylish products.

We enjoy a high reputation in the Chinese 4WD vehicle industry and have over 10 years of experience in global parts supply. Jingge offers a complete range of 4WD vehicle parts, including models such as Toyota Hilux, Mitsubishi Triton, Isuzu D-Max, Nissan Navara, and Ford Ranger.

This product catalog covers parts for popular Jingge models. We also offer parts for other models. To view the complete product range,

New and existing customers are welcome to contact us to discuss business and create a brilliant future together!

WHEEL SPACERS

- wheel spacers made from CNC machined
- Made of 6061-T6 aluminium
- Allows for the fitment of wider tyres
- Wider track and improved stability
- Precision fit hub-centric design to assure wheel balance
- Grade 12.9 wheel stud and lug nuts

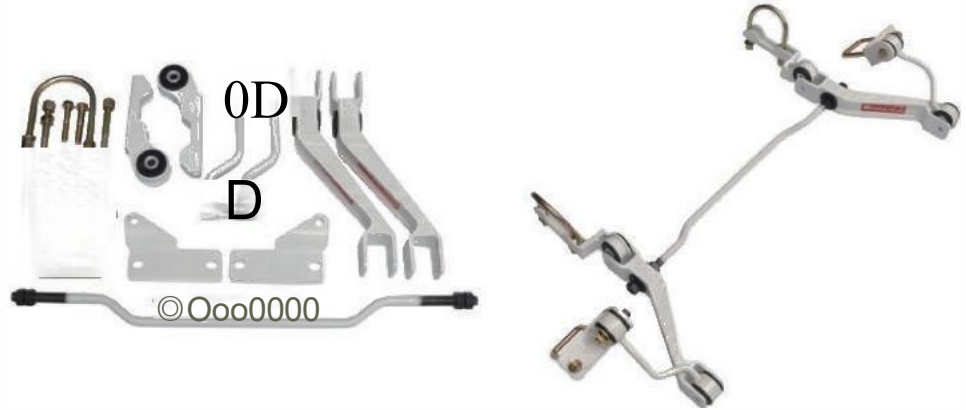

6X139.7-106.1: Toyota Hilux/Fortuner/FJ Cruiser

6X139.7-67.1: Mitsubishi Triton /Pajero Sport

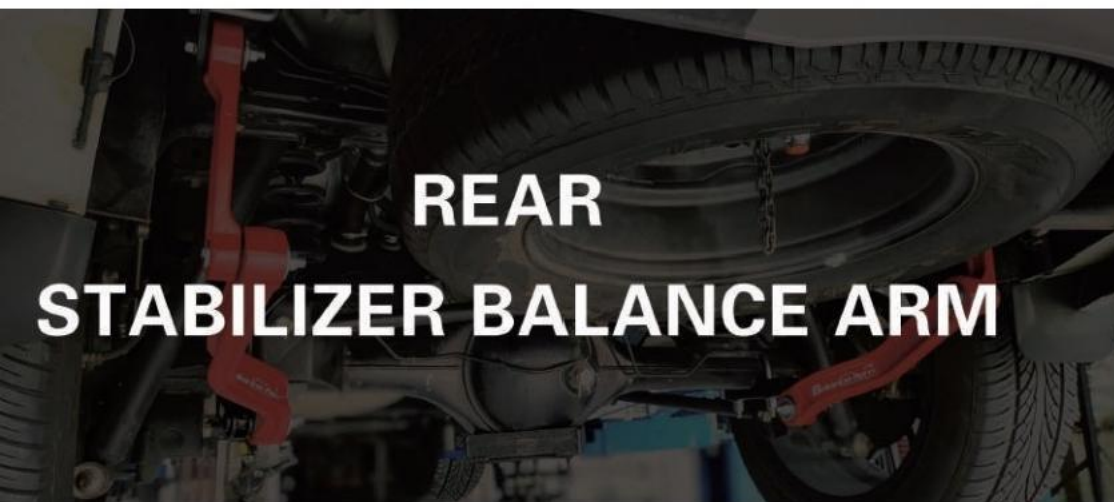

- Reduction of body roll when driving in curves and during fast changes of direction.
- Stabilizes the vehicle.
- Gives structural support.
- Unimpaired spring comfort at bilateral spring deflection.
- Decreasing the load difference between the wheels inside and outside the curve.
- Impacting the under-or over-steering tendency positively.

EXTENDED BALL JOINTS

Suitable for lifted vehicles. When the vehicle's suspension is lifted the upper arm moves to a downward position reaching the maximum angle of the standard ball joint. This extended ball joint allows the arm to be returned to a near standard position allowing full suspension movement without binding. Ball joints feature a greasable design and are extended 25mm over standard.

SWAY BAR SPACER

The kit allows the swaybar to maintain proper alignment /position to function properly and thus help restore vehicle stability.
Any car that has been lifted 2"or more should have this bracket installed because any lift over 2"will cause the OE swaybar to be "out of position" and thus can't flex/function properly.

COIL SPRING

Specialist manufacturer of aftermarket coil springs.

Use high quality and high stress spring steel.

Electro-static powder-coated for a gleaming appearance.

All Kinggo coil springs are designed to provide a safe, comfortable ride.

INTERCOOLER PIPING KIT

Stock plastic or rubber intercooler pipes can expand or crack under high boost levels, which causes much resistance and pressure drop. Piping kits are made of aluminum for increased durability and safety, minimize pressure loss and flow resistance.

ADJUSTABLE CARGO BAR

Secures cargo in the back of a pick-up truck, SUV or box trailer
Rubber coated feet protect painted surfaces and prevents slipping
Easily reposition bar anywhere in cargo area to hold different size and shaped loads
No tools required

TRUCK BED EXTENDERS

Expanded the usable area of truck bed and bed extender could be used as cargo divider after flipping in back. When it is not in use, flip it inside the bed, not affecting the use of the bed cover, and locking the bed cover makes the extender more secure. The width can be adjusted, choose the right width. Black finish for added rust and corrosion protection.

RECOVERY POINTS

recovery point range seeks to address issues surrounding generic tow points and their unsuitability for a range of recovery situations.

RECOMMEND PARTS

SHAFT SPACER

When suspension lift kit is fitted it increases the distance between the transfer box flange and the diff flange. This increased distance can cause the prop shaft to run out of spline travel. Fitting this prop spacer helps return the prop shaft to its normal operating length therefore allowing full spline travel which also helps reduce the characteristic "binding" of the yokes when a prop shaft is over extended.

KG-PSS04:T Toyota Hilux 2005+/Fortuner 2005+

REAR SHOCK EXTENDERS

Recommended for lifted vehicles that are using stock shock absorbers.

Retains the factory length of the shocks & prevents it from over stretching

KG-SE14: Toyota Hilux Revo

REAR PANHARD BRACKET

Panhard rod extension bracket is designed to correct suspension geometry of your lifted. With the lower mount of panhard rod raised by 2 inches, it restores proper panhard rod angle and raises roll center of the rear axle to help reduce body roll, improve handling and ride comfort
